Section B：Essay discussion questions (20%)

Please **choose one of the following** two questions to answer. Each carries the same marks.

Question 1

Compare and contrast Solution-focused Therapy (SFT) and Cognitive-behavioral Therapy (CBT) in terms of their basic theoretical assumptions, basic skills and the role of social worker. Moreover, discuss the concept of engagement and assessment in generic social work practice related to the above two therapeutic approaches with illustration of specific examples in social work settings.

Question 2

Please identify five common factors based on the research of Cameron & Keenan (2009) and explain their significance for social work practice with individual schooling youth.

Please answer with not more than 300 words.
